

Non-Renewable Energy

Robbie Renewable is confused and can't work out what this message is below. Can you unscramble each of the words?

Write the message in the boxes below:

COLA	C	○	A	○									
LOI	○	I	○										
DAN	A	○	D										
SAG	○	A	○										
RAE	A	○	○										
NNO-BEALEEWRN	N	○	N	-	R	○	○	E	○	A	○	L	○

□	□	□	□	□	□	□	□	□	□	□	□			
□	□	□	□	□	□	-	□	□	□	□	□	□	□	□

Non-renewable energy is energy that is running out. Once it is used up, there isn't any more!

Imagine if all the fuel was used up, would you miss having electricity?

In this box below, write down five things you would miss if you didn't have any electricity:

1	_____
2	_____
3	_____
4	_____
5	_____

Now join Renewable Robbie to learn about pollution.
