

Water Energy

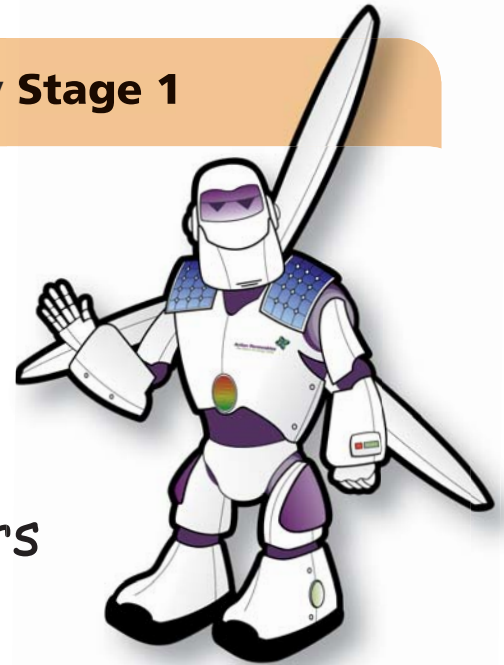

Renewable Robbie learnt that water was used years and years ago for energy.

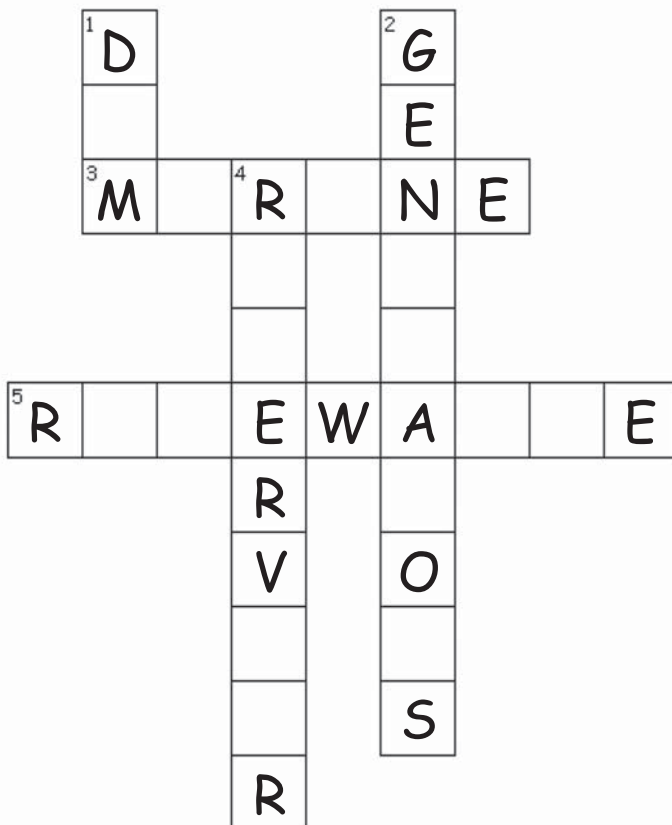

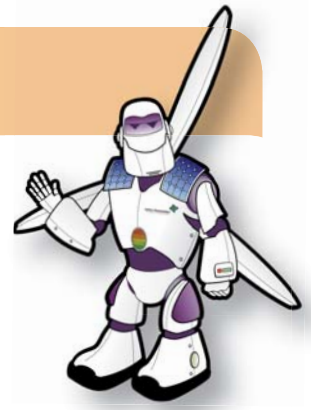

Look at the picture of a water wheel below. This is what many of them looked like. Can you colour in the picture?

Do you remember everything you learnt about water energy?

Try to complete this crossword on next page:

Across

3. A _____ turbine works like a wind turbine but it uses tides in the sea to turn the blades round.
5. This type of energy will never run out.

Down

1. A large concrete wall that can hold water back.
2. Inside the pipes the water turns machines called turbines which are connected to _____.
4. The name of the lake that is formed behind the dam

Renewable Robbie thought that was hard!

Join him to learn about energy that comes from plants and animals!
