

What is energy?

Hi boys and girls.
This is Renewable Robbie.

Energy is used to give us **electricity** and **heat** we need for our homes, schools, hospitals and other buildings. Renewable Robbie loves to play computer games, watch TV and listen to music. Do you like doing any of these things?

One day, Renewable Robbie decided he wanted to know where electricity comes from. All he has to do is press switches to get his lights on, his TV on, the oven on and so on! He knows that electricity can't just magically appear!

Do you know where your electricity comes from?

Join Renewable Robbie on his adventure to learn all about energy! First, try the Activity Sheet on Energy. Renewable Robbie hopes you will work hard but also have lots of fun!
