

What is Renewable Energy

What is renewable energy?

Renewable Robbie has learnt a lot about non-renewable energy. Have you? Renewable Robbie has learnt that non-renewable energy includes fuels like coal, oil and gas. He knows that non-renewable energy will eventually run out.

He wants to know what renewable energy is. Do you have any idea?

He hopes you guessed right:

Renewable energy is energy that can be used over and over again! As well as that, it doesn't harm the earth!

Renewable Robbie is very happy to learn about renewable energy and he wants to know where it comes from. He learns that renewable energy can come from the sun, wind, water and even plants and animals!

The table below sets it out clearly for you:

Non-renewable energy	Renewable energy
Coal	Wind
Oil	Sun
Gas	Water
	Plants and animals

Join Renewable Robbie to learn about all these different types of renewable energy! Before you do, complete the Activities on Renewable Energy!
