

Energy?

Renewable Robbie uses a lot of energy for heat and electricity.

Think about the energy you use in a day.

You are going to imagine you keep a diary to record all the times you make use of heat and electricity in one day. For example, it could start like this:

Day: Wednesday 14 January

I got out of bed this morning and turned the heat on.
I made toast in the toaster and boiled water in a kettle.
I put on the TV while I had my breakfast and so on!

Use the space below to write your own extract:

Day:

How did you get on? Renewable Robbie was shocked at the amount of electricity he uses in a day! He wants to know where it comes from. Join him to learn all about non-renewable energy!
