

Global Warming

Renewable Robbie was very shocked when he learnt about global warming. Can you work out what this sentence is below by unscrambling the letters beside it? Some letters have been put in for you!

G L N M I
 W A R M N
 A R R T E R G
 W E T B I T S
 M E A T H A N G
 E G A O S I L H E

Did you get it right? Renewable Robbie hopes you did!

Can you fill in the blanks below to find out what the causes of global warming are? Use the words below the paragraph to help you.

Gases in the air like _____ keep the planet warm which is needed for the _____ to survive. The problem is that people are burning more and more _____ which means there is more _____ and too much carbon dioxide in the air. This means the world is getting _____. Even a little extra warming may have disastrous effects on _____.

- WARMER
- EARTH
- CARBON DIOXIDE
- EARTH
- FOSSIL FUELS
- POLLUTION

Work in groups

Read all the information about the causes and effects of global warming. Renewable Robbie discovered that there are a lot of problems all around the world because of global warming. The ice at the north and south poles is starting to melt, in wet countries there will be more flooding, while hot and dry countries will become even hotter and drier.

Get into groups of five people. Your task is to write a news report about global warming to explain the causes and effects.

Read the following sentences:

I am a fisherman. I live in Alaska which is very far north west of America.

I am a farmer. I live in the Sudan, a very hot and dry country in Africa.

I am a rice farmer. I live in Bangladesh which is a poor country in the South of Asia which often floods.

In your groups, you will have two news readers and the other three people will decide which of the three characters they want to be. In your groups, think about how global warming will affect each character. If it is possible, spend some time on the internet finding out a bit about each country.

The two news readers need to decide what to say about global warming and think of a way to interview the other three people. Each character needs to think of what to say about how global warming will affect them. The news report will be 5 minutes long and you will present it to the rest of your class!!

Renewable Robbie says Good Luck, you can do it!

Then, join Renewable Robbie to learn about renewable energy!
