

Non - Renewable Energy?

Renewable Robbie has learnt all about fossil fuels.

Have you? Do you remember what you read about them?

Unscramble the sentences below and write the full sentence underneath:

electricity oil used power stations gas to make coal and are in

fossil fuels known coal as oil and gas are

wires electricity home reaches your along

coal are non-renewable gas and oil

energy run out that eventually non-renewable is energy will

Well done! Now you know a lot about fossil fuels. Can you remember where fossil fuels come from? Renewable Robbie found out that fossil fuels come from the remains of dead plants and animal that were formed hundreds of millions of years ago. Write a sentence to explain where each of the following came from:

Coal comes from:

Oil and Gas come from:

WORK IN PAIRS

As you already know, fossil fuels are non-renewable, so they will eventually run out. Renewable Robbie thinks this is sad. What do you think about it? How would you feel if you didn't have electricity?

Get into pairs and think about what you would miss if you didn't have electricity or heat. Renewable Robbie would really miss playing the play station. Write a list of what you would miss below:

**Join Renewable Robbie to learn all about how
burning fossil fuels cause POLLUTION!!!**
