

# Saving Energy

Renewable Robbie made a list of different ways he could save energy. Can you think of anything else? Think about it for 3 minutes. Then ask the rest of your class if anyone has thought of any other ways to save energy.

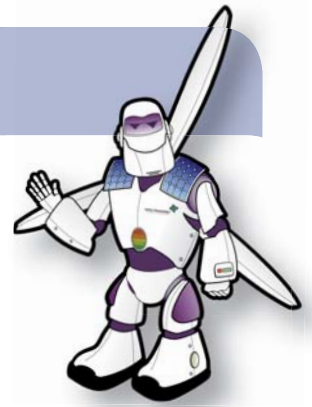

Write any ideas into this box below:

## Work in groups

Renewable Robbie thinks it is very important to try to save energy. He wants you to get into groups of 3 or 4 people. Get a big piece of paper and pens/ paints/ colours.

You will work together to make a poster to try to convince the public to save energy. Use the energy saving ideas Renewable Robbie came up with as well as the ideas your class had to make a colourful, attractive poster.

Once completed, present your group posters to the rest of your class.

**Renewable Robbie says good luck and he is sure they will be great!**
