

Saving Energy

Renewable Robbie was happy to learn all about renewable energy. He thinks that when he buys his own house in the future, he would like to use renewable energy to heat it and provide electricity. He also wondered if there was anything he could do now.

He came up with a list of things he could do. Can you think of anything you can do to save energy? This is Renewable Robbie's list:

- Take a shower rather than a bath as it uses as little as a quarter of the water
- Switch off lights when you leave a room
- Only boil the water you need for a cup of tea or coffee
- Don't leave your TV on standby as this still uses a lot of electricity
- Cycle or walk instead of travelling in a car
- Turn off your computer and play station when you are not using them
- Don't put on your dishwasher or washing machine until they are full
- Don't keep water running the whole time you are brushing your teeth

Renewable Robbie finds it hard at times to remember all these things but he is very happy that he is making a difference. Join him now in the Activities page!
